

Job offer

Student assistant for technical creation of eLearning content of the ICCAS (Innovation Center for Computer-Assisted Surgery)

The Innovation Center for Computer-Assisted Surgery was established in 2005. It is one of the interdisciplinary research centers of the University of Leipzig and the Faculty of Medicine. Here, engineers and computer scientists optimize, develop and integrate new assistance systems for the surgical field in close cooperation with physicians.

As support for the creation of digital teaching content, an assistant up to max. 15h/week is sought for active collaboration. A longer-term collaboration is desired.

Tasks:

- Supporting the technical implementation of eLearning content (learning videos, webinars, ...) in coordination with instructors
- Researching content and creating templates for digital publication
- Preparation and control of digital publications
- Various diversified tasks in the area of the office

Scope:

- Up to max. 15h/week with SHK pay-rate
- Vacation entitlement and flexible time allocation, in coordination with team
- Long-term employment relationship desired

Requirements:

- Knowledge of Office applications
- Knowledge in the creation of digital content and in the use of corresponding software (authoring tools, eLearning management systems)
- Ability to work in a team, independence, diligence and reliability
- Good written and spoken English skills desired
